

Crusher

Examples of Products:

- Wheat
- Barley
- Oats
- Peas
- Maize
- Soybeans
- Feed mixtures

The quality of the SCHULE crushers are found in:

- Very robust welded construction, so that vibration is reduced at a minimum
- Even repartition of the product on the complete roll length, in order to have uniform broken seeds/cereals over the complete length of the roll
- Over dimensioned roll bearings guarantee a minimum of vibration, long lifetime and minimum of noise level
- Robust construction of the flaking rolls, made out of special casted steel with hot pressed shaft ends
- Good accessibility on all wear parts for a quick and easy maintenance
- Sturdily welded construction, finished with precision, so vibrations are reduced to an absolute minimum
- Driving mechanism mounted directly on the framework
- Electrical supply

Technical data

Diameter 250-300-400 mm

Length 500-1000-1300-1600-2100 mm

With one, two or three pairs of rolls

The capacity to be determined according enquiry and depending on product.
